

# Conserving water over the summer

Water is an essential need for our livelihood. During the summer months it is likely for there to be less rain, and so water becomes low in availability. Combining this with the below average winter rains and increasing demands for water, the likelihood of water restrictions being implemented is high.

Conserving this precious natural resource on our farms and daily lives, not just for our current situation but also for the future. Stopping unnecessary water wastage is one of the best ways to do so.

## Follow these tips and tricks to get the most out of the summer

**Catch and use rainwater**

**Use high pressure nozzles and trigger guns**

**Regularly look for water leaks and repair**

**Use water efficient machinery and equipment**

**Choose to use drop irrigation**

**Shut off taps properly**

**Water at dusk or dawn, not in the heat of the day**

**Regularly monitor your water meter**

**Antenno**

Be informed. Get involved.

## The easiest way to stay up-to-date

The easiest way of hearing about water restrictions, or any other Council news, is by downloading the free Antenno app. Antenno sends you alerts and notifications about places and topics that you care about. It doesn't ask for any personal information or log in details, so it's a easy way to stay informed. There are two ways you can use Antenno; to receive

notifications from Council, or by reporting back to Council on issues that need sorting or feedback for us.

Other ways to stay up-to-date are by:

- liking and following our Facebook page 'South Taranaki District Council'.
- Heading to our website [www.southtaranaki.com](http://www.southtaranaki.com)

[www.southtaranaki.com](http://www.southtaranaki.com)

Call us 24/7 on 0800 111 323
